

PROFILE

Computer Science graduate from the University of North Carolina at Greensboro, based in Charlotte, NC. I build human-centered applications using Java/Spring Boot, Python, and modern JavaScript (TypeScript/React), with experience developing RESTful APIs and integrating PostgreSQL/MySQL databases. Comfortable with Git, Linux, and Docker, I collaborate effectively in team environments and approach challenges with persistence, delivering clean, reliable solutions. I am a fast learner who embraces feedback and continuously seeks to grow as an engineer.

Data Structure & Algorithms
REST APIs / JSON
SpringBoot

NATHANIEL GEBREGZIABHER

Full Stack Developer

EDUCATION

University of North Carolina at Greensboro **GPA: 3.3**
August 2021 - December 2025

- Bachelor Of Science in Computer Science / Minor in Mathematics

WORK EXPERIENCE

U-Project LLC **Social Media Manager and Web Developer**
September 2022– Present

- Developed and managed companies website

Time to Move LLC **Operations Manager**
July 2017– Present

- Oversee day to day operations which include: Interstate Travel, Booking appointments, Recruiting, Expenses and Maintenance on work vehicles

PROJECTS

StockSyncer **Demo**
Built a full-stack stock dashboard that aggregates real-time market data, interactive time-range charts, and ticker-specific news, with a per-stock AI chatbot integrated via API to provide contextual company insights.

TruckShare **Link**
Developed a peer-to-peer rental platform connecting individuals who need transportation for large items with truck owners offering vehicles and tools for rent, implementing backend services and database integration to manage listings, bookings, and user interactions.

L'Oreal Chatbot **Link**
Engineered a web application that dynamically organizes L'Oréal product data from a structured database and integrates a website-specific AI chatbot via API. The chatbot provides contextual product assistance tailored to the platform's catalog.
