SUMMARY

Computer Science graduate with hands-on experience building full-stack applications using Java, Spring Boot, Python, and React. Strong background in developing RESTful APIs, integrating relational databases, and designing scalable backend systems.

EDUCATION

University of North Carolina at Greensboro

Dec 2025

Bachelor of Science in Computer Science | Minor in Mathematics | GPA: 3.3

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, C

Frameworks & Libraries: Spring Boot, React, Next.js, Node.js, Express

Databases & Data: PostgreSQL, MySQL, SQL, Data Modeling, Data Validation

Developer Tools: Git, GitHub, GitHub Actions (CI/CD), Docker, Linux

Backend & APIs: RESTful APIs, API Integration, Authentication, JSON

Core Concepts: Data Structures & Algorithms, OOP, System Design, Debugging

CERTIFICATIONS

Web Development Certificate – Global Career Accelerator (Intel-Supported Program)

2025

[View Credential](#)

- Completed hands-on web development projects using modern technologies including JavaScript, React, and Node.js
- Built and deployed full-stack applications integrating frontend interfaces with backend services and APIs
- Collaborated on real-world scenarios using industry tools and best practices in software development

PROJECTS

StockSyncer (Full-Stack Application)

React, Node.js, PostgreSQL

- Developed a stock analytics platform delivering real-time market data, financial news, and interactive charts
- Built RESTful APIs to aggregate and process external financial data with error handling and normalization
- Designed relational database schema for scalable storage and efficient querying
- Integrated an AI chatbot for contextual company insights

TruckShare (Peer-to-Peer Rental Platform)

Node.js, Express, PostgreSQL

- Built a web platform connecting users with truck owners for transportation needs
- Developed backend services for listings, bookings, authentication, and transactions
- Designed database models to ensure data integrity and consistency

L'Oréal Product Chatbot Application

JavaScript, APIs

- Engineered a web application to organize product data and deliver recommendations
- Integrated API-based chatbot for real-time, context-aware assistance

EXPERIENCE

U-Project LLC — Web Developer

Sept 2022 – Present

- Developed and maintained company website, improving performance and usability
- Implemented frontend and backend enhancements to support business functionality

Time to Move LLC — Operations Manager

July 2017 – Present

- Managed logistics, scheduling, hiring, and daily operations
- Coordinated interstate transportation and optimized routing efficiency
